- Coordinated most of the field activities in a 5.9 mil euros LIFE+, using ARCGIS 10.2 all along, managed large databases, worked with TerraSync, first contact with Python scripts for ARCGIS.

### MAIN SKILLS

### LANGUAGE SKILLS

### PROFILE

I'm a python developer, nature lover and problem solver! I have a strong passion for tech, a natural sciences degree, a M.Sc., 5 years working with ARCGIS, QGIS, databases, VBA. In 2017 i decided to start learning Python with a local school ([www.scriucod.eu](http://www.scriucod.eu)), then learned Django and web development on my own. I initially used the skills for personal projects or friends, but later on, i started my own web development business, obtaining a few good contracts by now. My aim for the future is to go deeper into programming, learn new skills, by getting involved in complex and challenging projects. My github portfolio can be viewed [here](#).

### EDUCATION BACKGROUND

2017 - 2018

#### Programming Course

##### SCRIU COD

[www.scriucod.eu](http://www.scriucod.eu)

- A 6 months, unconventional python programming course, where we would learn from actually working on small personal projects, that each of us was free to choose.

2010 - 2012

#### Master in Science

##### TRANSILVANIA UNIVERSITY

[www.unitbv.ro](http://www.unitbv.ro)

- Used Microsoft Access to manage databases, R and STATISTICA to compute statistical tests and charts, QuantumGIS to generate GIS maps with a large database.

2006 - 2010

#### Bachelor in Science

##### TRANSILVANIA UNIVERSITY

[www.unitbv.ro](http://www.unitbv.ro)

- The final thesis included lots of statistical tests on a quite significant amount of sampled data. First but minor contact with ArcGIS.
